Manan Rohilla

Faridabad, India | +91 9810455915 | mananr0135@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Full-stack developer with hands-on experience building end-to-end web and mobile applications. Proficient in the MERN stack (MongoDB, Express.js, React, Node.js) with a solid understanding of REST API design, database modeling, and real-time communication via WebSockets. Passionate about building scalable, maintainable systems with clean architecture.

Skills

Languages: JavaScript, TypeScript, Dart, C/C++

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: MongoDB, Firebase, SQLite

Architecture: MVVM, Clean Architecture, MVC

Tools: Git, GitHub, VS Code, Postman, Android Studio

Experience

Software Development Engineer - I Oct 2025 – Present

Sanora India Pvt Ltd

- Designed and developed RESTful APIs for authentication, content delivery, and real-time data synchronization using Node.js and Express.js.
- Built and maintained both frontend UI components and backend services, delivering full-stack features across 2 live production applications.
- Implemented clean architecture patterns (MVVM, MVC) on both client and server side, ensuring modular, testable, and maintainable codebases.
- Contributed 15+ major features and 10,000+ lines of production code; resolved 100+ critical bugs across frontend and backend layers.
- Optimized API response times and server-side performance through profiling, query optimization, and architectural improvements.

Associate Software Developer Oct 2024 – Oct 2025

SwaLay Digital

- Integrated RESTful APIs for data fetching, user authentication, and real-time content delivery in cross-platform applications.
- Implemented state management solutions (Provider, Riverpod) and collaborated on backend service integration workflows.
- Optimized application performance and reduced build times through code refactoring, profiling, and best practices.

Projects

QuestAI – Full-Stack AI Agent

- Built a full-stack AI-powered system with React frontend and Node.js/Express backend for real-time agent interaction.
- Implemented WebSocket-based streaming for low-latency AI response delivery to the browser client.
- Designed a fault-tolerant backend architecture with error recovery and session persistence using MongoDB.
- Integrated third-party AI APIs with request queuing and rate-limit handling.

Subject Mastery | Play Store

- Built REST API-driven mobile application with authentication flows and secure session handling.
- Integrated MongoDB-backed content delivery endpoints with efficient data modeling and indexing.
- Implemented ML-based detection features via REST service integration for assessment integrity.

Sattelite | Play Store

- Designed local-first data layer using sqflite and Hive, mirroring patterns used in MongoDB document storage.
- Built dynamic PDF report generation pipeline, applying data transformation concepts core to backend development.

Education

JSS Academy of Technical Education, Noida Aug 2021 – Jul 2025

Bachelor of Technology in Information Technology

CBN Sr. Sec. School Apr 2020 – Jun 2021

Higher Secondary Education
