Summary

Software Development Engineer with almost 1 year of experience building mobile applications and a strong foundation in Flutter Android development. Skilled in mobile app architecture, REST API integration, and state management. Familiar with MVVM, clean architecture principles, and performance optimization techniques. Passionate about developing efficient, user-friendly mobile applications and continuously improving Android development skills.

Skills

Languages: C/C++, Dart

Architecture: MVVM, Clean Architecture

Frameworks: Flutter

Networking: REST APIs, JSON

Tools: Git, GitHub, Android Studio, VS Code, Jira, Slack

Databases: Firebase, MongoDB

Experience

Software Development Engineer - I Oct 2025 – April 2026

Sanora India Pvt Ltd

- Developed scalable mobile applications with a strong focus on Android architecture principles and performance optimization.
- Implemented clean architecture patterns (MVVM) ensuring modular, testable, and maintainable codebases.
- Integrated RESTful APIs for authentication, content delivery, and real-time features with efficient error handling.
- Contributed around 15 major features, over 10,000+ lines of production code across 2 live projects, and resolved 100+ critical bugs.
- Optimized UI performance and navigation flows for smooth user interaction across complex screens.

Software Research Intern Feb 2025 – May 2025

Raphe mPhibr

- Built a strong foundation in Flutter development by working on scalable and high-performance cross-platform applications.
- Gained in-depth understanding of core Flutter concepts including widgets, layouts, navigation, and lifecycle management.
- Implemented efficient state management using Provider, Riverpod, and setState to ensure smooth and maintainable app performance.
- Collaborated on designing responsive and user-friendly UI, improving overall user experience across Android and iOS platforms.
- Optimized application performance and reduced build times through code refactoring and best practices.

Projects

Subject Mastery | Play Store

- Designed a scalable mobile application following clean architecture and MVVM concepts.
- Implemented authentication flows and secure session handling.
- Built interactive UI components and optimized performance for real-time user engagement.
- Integrated ML-based detection features to enhance assessment integrity.

Sattelite | Play Store

- Built fully offline Flutter app using sqflite and Hive for on-device storage of sensitive financial documents with zero internet dependency.
- Implemented on-device OCR-based document scanning using google_ml_kit for PAN, Aadhaar, and bank statement verification.
- Developed dynamic PDF generation using pdf and printing packages to compile verified financial data into structured local reports.

QuestAI – AI Agent

- Built a full-stack AI-powered system with real-time communication.
- Implemented WebSocket-based streaming and resilient backend architecture.
- Focused on high availability and fault-tolerant system design.

Education

JSS Academy of Technical Education, Noida Aug 2021 – Jul 2025

Bachelor of Technology in Information Technology

CBN Sr. Sec. School Apr 2020 – Jun 2021

Higher Secondary Education
